PeoplesHR

Limitations for Configuration

Manage | Grow | Transform

Configuration entitlements and conditions by plan

Version 3.0

PeoplesHR

Limitations for Configuration

1. Introduction

1.1 Purpose

This document sets out the configuration limitations that apply to the Manage, Grow and Transform plans within the PeoplesHR product packaging. It is intended to give customers a clear view of what is included in each plan, and of the conditions that apply, before and during implementation.

1.2 How to read this document

The limitations reflect the configuration entitlements available under each plan. They should be read together with the Customer's subscribed modules and the agreed implementation scope.

- **Section 2** summarises the three plans.
- **Section 3** compares the configuration entitlements of each plan at a glance.
- **Section 4** gives the notes and conditions that apply to the entitlements.
- **Section 5** explains which requirements are treated as additional work and may incur additional charges.
- **Section 6** sets out the conditions for integration with third-party attendance devices.

1.3 Terms used

Term	Meaning
Customer	The organisation that has subscribed to PeoplesHR.
Entitlement	The configuration capacity included in a plan, as stated in Section 3.
As agreed with PeoplesHR	The requirement is not set as a fixed limit for the plan. It is discussed and as agreed with PeoplesHR and defined in the applicable implementation scope.
Implementation scope	The services, deliverables and configuration agreed between PeoplesHR and the Customer for the implementation.

PeoplesHR

Limitations for Configuration

2. Plan Overview

Plan	Positioning	Designed for
Manage	Run the Organisation	Core operational foundation for running day-to-day HR processes across PeoplesHR. Designed for organisations that need a structured and reliable HR operating environment without extensive custom configuration.
Grow	Invest in Your People	Builds on Manage with greater flexibility, configuration capacity, automation and management visibility as organisational complexity increases. Built for organisations that are scaling their people operations and need more configurability and automation, while keeping a structured product framework.
Transform	Lead with People Intelligence	Designed for complex and enterprise-scale organisations that need PeoplesHR configured more closely around their operating model and workforce. Provides deeper configuration, enterprise-level process automation, integration and advanced workforce insight to support complex people operations and strategic decisions.

Capabilities under every plan apply according to the Customer's subscribed modules and the agreed implementation scope.

PeoplesHR Limitations for Configuration

3. Configuration Entitlements

Numbers shown are the maximum included in the plan. Where a capability includes a 'See Note' reference, additional details and conditions are provided in Section 4.

Capability	Manage	Grow	Transform
Organisation and employee data			
Organisation structure (company levels) See Note 1	Up to 3 levels	Up to 5 levels	As agreed with PeoplesHR
Employee information fields	Standard fields	Standard fields and up to 10 custom fields	As agreed with PeoplesHR
Employee information validations	Standard validations	Up to 2 custom validations	As agreed with PeoplesHR
Alerts See Note 2	Standard email alerts and 5 custom alerts	Standard email alerts and 10 custom alerts	As agreed with PeoplesHR
Employee lifecycle and workflow			
Lifecycle / movement types See Note 4	Up to 5 lifecycle types	Up to 10 lifecycle types and 10 validations	As agreed with PeoplesHR
Employee exit management See Note 5	Exits processed through the employee lifecycle	Included	Included
Supervisor approval dashboard	Standard supervisor approval view	Standard view plus dashboards for leave, expense claims and team requests	Standard view plus dashboards for leave, expense claims and team requests
Single Sign-On (SSO) See Note 1	Not included	Not included	As agreed with PeoplesHR and defined in the implementation scope
Payroll and benefits			
Payroll processes See Note 3	Up to 4	Up to 7	As agreed with PeoplesHR
Pay groups See Note 3	Up to 2	Up to 4	As agreed with PeoplesHR

PeoplesHR

Limitations for Configuration

Capability	Manage	Grow	Transform
Parallel pay-runs See Note 3	Up to 2	Up to 2	As agreed with PeoplesHR
Custom payroll formulas	Not included	Up to 5	As agreed with PeoplesHR
Benefit types See Note 2	Up to 3	Up to 8	As agreed with PeoplesHR
Loan types See Note 2	Not included	Up to 5	As agreed with PeoplesHR
Leave and holiday calendars			
Holiday calendars	Up to 2 company calendars	Multiple company-wide and location-specific calendars (no fixed limit specified)	As agreed with PeoplesHR
Organisation leave types	Statutory leave types only	Statutory leave types and up to 3 organisation-specific types	Statutory leave types and up to 5 organisation-specific types
Reports and letters			
Standard reports and letters See Note 6	Included	Included	Included
Custom reports	Not included	Up to 10	As agreed with PeoplesHR
Scheduled (automated) reports	Not included	Up to 3	As agreed with PeoplesHR
Lexi AI			
Lexi AI Insights See Note 7	Available as an add-on	Available as an add-on	Available as an add-on
Lexi Super Agent See Note 7	Available as an add-on	Included	Included

Key: Not included = not available under the plan.

As agreed with PeoplesHR = discussed and as agreed with PeoplesHR and defined in the implementation scope.

PeoplesHR Limitations for Configuration

4. Notes and Conditions

Note 1 - Transform plan requirements. Where an entitlement is shown as "As agreed with PeoplesHR", the requirement is as agreed with PeoplesHR and defined in the applicable implementation scope. This applies to organisation structure and, for Transform, to Single Sign-On requirements.

Note 2 - Additional alerts, benefit types and loan types. Additional alerts, benefit development or loan-type development outside the agreed entitlement or implementation scope is subject to effort estimation and additional charges.

Note 3 - Payroll processes, pay groups and parallel pay-runs. These are separate configuration entitlements and are shown separately in Section 3. Additional payroll configuration outside the agreed entitlement or implementation scope is subject to additional charges.

Note 4 - Employee lifecycle and movement types. The existing standard movement types include promotions, transfers, increments, confirmations and resignations. Additional development or customisation outside the agreed entitlement or implementation scope is subject to effort estimation and additional charges.

Note 5 - Employee exit management. Under Manage, employee exits are processed through the employee lifecycle, while dedicated employee exit management is included under Grow and Transform. This difference does not restrict automated final settlement and relieving documents, which are included across all three plans.

Note 6 - Standard reports and letter templates. Manage, Grow and Transform provide access to standard reports and to HR and statutory letter generation. The implementation allowance covers five (5) standard reports per applicable module and five (5) standard letter templates, based on existing PeoplesHR formats. The standard reports list and letter formats are provided separately. Requests for additional reports or letter templates are handled according to the entitlements of the applicable plan. Where greater customisation or flexibility is needed beyond the plan entitlement, the Customer will need to upgrade to the next applicable plan.

Note 7 - Lexi AI. Lexi AI Insights is available as an add-on under all three plans. Lexi Super Agent is available as an add-on under Manage and is included under Grow and Transform. For both, the available capabilities and insights depend on the PeoplesHR modules enabled for the Customer.

Note 8 - Initial data migration. The initial employee information migration is carried out by the PeoplesHR implementation team as part of the agreed implementation scope. Additional data migration, including further data uploads, historical data migration or other migration activities, is defined separately in the project scope and is subject to effort estimation and applicable additional charges.

Note 9 - Interactive Analytics. If the Customer has subscribed to the Interactive Analytics module, implementation services will make available the existing dashboards and the existing data library of the module. Any additional dashboards or data libraries required for specific Customer requirements are priced separately after the effort is estimated.

5. Additional Work and Charges

Requirements within the entitlements in Section 3 are covered by the agreed implementation scope. The table summarises how requirements beyond the entitlement are handled.

Area	Treatment beyond the entitlement or agreed scope
Alerts	Effort estimation and additional charges.
Lifecycle / movement types	Additional development or customisation is subject to effort estimation and additional charges.
Payroll processes, pay groups and parallel pay-runs	Additional configuration is subject to additional charges.
Benefit types	Additional benefit development is subject to effort estimation and additional charges.
Loan types	Additional loan-type development is subject to effort estimation and additional charges.
Standard reports and letters	Handled according to the plan entitlements. Where greater customisation or flexibility is needed, the Customer upgrades to the next applicable plan.
Data migration	Further uploads, historical data migration and other activities are defined separately in the project scope, with effort estimation and additional charges.
Interactive Analytics	Additional dashboards or data libraries are priced separately after effort estimation.

PeoplesHR Limitations for Configuration

Area	Treatment beyond the entitlement or agreed scope
Third-party attendance devices	Integration is subject to PeoplesHR's agreement and compatibility verification. Effort is estimated separately and charged to the Customer (see Section 6).

For Transform requirements, or any requirement beyond the entitlements in this document, please contact your PeoplesHR representative.

6. Third-Party Attendance Device Integration

- **Discretion and compatibility.** Integration of PeoplesHR with third-party attendance capturing devices is done at the sole discretion of PeoplesHR and is subject to verification of the compatibility of those devices, as PeoplesHR considers necessary.
- **Effort and charges.** The effort involved in integrating such devices is estimated separately, and the related charges are payable by the Customer.
- **Customer responsibility.** Where PeoplesHR agrees to the integration, the Customer must ensure that the attendance capturing devices record data to an intermediary database (MS SQL), which in turn pushes the attendance data to PeoplesHR.
