

Limitations for Configuration

This document includes the current (*This document was last updated on 05.02.2025*) limitations for configurations of PeoplesHR professional services

Limitation to Configurations

- Standard Alerts will be provided with the project implementation. The Company can develop additional alerts after estimating the effort requirement and charging for the same.
- Five (05) existing standard lifecycle/movement types will be provided with the product (Promotions, transfers, increments, confirmations and resignations). Additional Lifecycle / Movement types can be developed by the Company after estimating the effort for such developments/customization and charging for the same.
- One (01) payroll process will be configured as part of the implementation. Any additional payroll processes can be configured at an additional charge.
- If the Customer has subscribed for the Benefits Management module, the implementation will include the charges for configuration of two (02) standard benefit types. Additional benefit types can be developed by the Company after estimating the effort for such developments and charging for the same.
- If the Customer has subscribed for the Loan Management module, Implementation Services will include the charges for configuration of Two (02) Loan Types. Additional Loan types can be developed after estimating the effort for such developments and charging for the same.
- Five (05) Standard Reports for each applicable module based on PeoplesHR existing formats and Five (05) Standard Letter Templates based on PeoplesHR existing formats will be provided with the project implementation. Please refer <https://peopleshr.com/report/> for PeoplesHR standard reports list and letter formats. Additional reports or letters templates can be developed after estimating the effort for such developments and charging for the same.
- Initial data migration will be done by PeoplesHR implementation team. Only one data upload will be done within the proposed setup fee. Any additional data uploads or historic data uploads could be requested from PeoplesHR in writing and could be executed subject to an additional charge. The Company will carry out an effort estimation and charge for the same.

Limitations for Configuration

- If the Customer has subscribed for Interactive Analytics Module, Implementation Services will avail the existing Dashboards and the existing data library available on PeoplesHR Interactive Analytics module. Any additional dashboards or data libraries, which require to be added as per specific Customer requirement, will be priced separately after estimating the effort for such developments/customizations.
- Integration of PeoplesHR Software with third-party attendance capturing devices will be done at the sole discretion of the Company and is subject to verification of compatibility of such devices as deemed necessary by the Company. Efforts involved in integration to such devices shall be estimated separately and related charges shall be paid by the Customer.
- In the event PeoplesHR agrees to such an integration as mentioned above, the Customer shall be responsible to ensure that the attendance capturing devices record data to an intermediary database (MS SQL) which will in turn push the attendance data to PeoplesHR Software.
